

SHIVAM POKHARKAR

Cloud Security Engineer | AWS SAA & Terraform Certified | SOC Analyst | DevSecOps
shivam.pokharkar18@gmail.com | +91 9270236130 | Pune, India | LinkedIn | GitHub | TryHackMe

PROFESSIONAL SUMMARY

AWS Certified Solutions Architect – Associate and **HashiCorp Terraform Associate** – final-year Computer Engineering student with hands-on experience building **production-grade cloud security automation** on AWS. Designed and deployed a **serverless SOAR pipeline** using Terraform, Step Functions, EventBridge, and dual AI providers (Gemini + Claude via Bedrock) – **MTTR reduced from ~100 minutes to ~20 seconds** for automated findings. Hands-on **SOC Analyst** at Maharashtra Cyber (Government of Maharashtra) – operating Splunk and IBM QRadar across live threat investigations. Awarded **Official Appreciation Letter** by the **Deputy Inspector General of Police, Maharashtra Cyber (ADGP Mantralaya)**. **CEH v13 Trained** | **Jr. Penetration Tester (TryHackMe)** | SC-200 in progress.

CERTIFICATIONS & TRAINING

AWS Certified Solutions Architect – Associate (Feb 2026) | **HashiCorp Terraform Associate** (Mar 2026) | **CEH v13 Training** – EC-Council (Jul 2025) | **Jr. Penetration Tester** – TryHackMe | **Jr. PT Learning Path** – TryHackMe | **CCNA** – Cisco Networking Academy | **Red Hat System Admin II (RH134)** | **NPTEL Cloud Computing Elite** – IIT Kharagpur | *Microsoft SC-200 / Sentinel – In Progress*

CORE COMPETENCIES

Cloud Security & IaC

AWS Security Hub • GuardDuty • CloudTrail • IAM • CloudWatch • EventBridge • Lambda • Step Functions • SNS • Secrets Manager • **Terraform** • GitHub Actions CI/CD • Checkov

SIEM & Detection Engineering

Splunk • IBM QRadar • Microsoft Sentinel (Learning) • KQL (Learning) • Alert Triaging • Detection Rule Development • SOC Playbooks • Log Analysis • OSINT • Threat Hunting

Offensive & Frameworks

CEH v13 • Jr. Penetration Tester • Burp Suite • Nmap • Wireshark • MITRE ATT&CK • NIST CSF • ISO 27001 • SOC 2 • OWASP Top 10 • Falco/EKS Runtime Security

PROFESSIONAL EXPERIENCE

SOC Analyst Intern | Maharashtra Cyber, Government of Maharashtra

Jun–Dec 2025

- Operated **Splunk** and **IBM QRadar** SIEM platforms within a live government SOC – triaging **50+ alerts daily**, developing and tuning **detection rules** and **use cases**, performing log correlation, incident analysis, and maintaining structured **incident response playbooks** aligned with GRC and compliance reporting standards.
- Conducted **proactive Threat Hunting** and **OSINT investigations** to identify external threat indicators; performed in-depth incident investigations, produced intelligence reports on IoCs, and coordinated remediation with internal government stakeholders; contributed to **Social Media Monitoring and Cyber Threat Analysis** supporting active law enforcement operations.
- Awarded **Official Appreciation Letter** by **DIG Sanjay Shintre IPS, Maharashtra Cyber (ADGP Mantralaya)** for exceptional technical knowledge, analytical ability, and measurable contribution to the organisation's cybersecurity posture.

Virtual Internships | Palo Alto Networks | AWS Academy | Cisco AICTE

May–Dec 2024

- Configured **firewall policies** and validated **Zero Trust** segmentation (Palo Alto); designed **multi-tier secure AWS architectures** with IAM, VPC, CloudWatch, CloudTrail; simulated enterprise network security with OSPF, ACLs, VLANs (Cisco).

KEY PROJECTS

Serverless SOAR Pipeline on AWS | Terraform, Python, Step Functions, EventBridge, Lambda, Bedrock (Gemini + Claude), DynamoDB, SNS, API Gateway, Security Hub, Checkov, GitHub Actions

- Built a **fully serverless SOAR** system on AWS – ingesting Security Hub findings via **EventBridge**, routing through a **Step Functions state machine** with AI triage (Gemini/Claude via Bedrock as hot-swappable providers), executing remediation playbooks for **S3, IAM, and VPC** misconfigurations; supports automated (Cat A) and **1-click admin approval** (Cat B) workflows via HTML email + API Gateway; **MTTR reduced from ~100 min to ~20 sec (88% reduction)**.
- Provisioned **14 Terraform modules** (8 least-privilege IAM roles, VPC, Lambda, DynamoDB, SNS, Secrets Manager, API Gateway, CloudWatch); GitHub Actions CI/CD with **Checkov IaC scanning** enforced on every PR; React SPA dashboard backed by API Gateway + DynamoDB for real-time visibility, manual controls, and undo. System runs at **\$0.02/month**.

Falco Runtime Threat Detection on Amazon EKS | Kubernetes, EKS, Helm, Falco, Docker, CloudWatch, YAML, Linux, Bash

- Deployed **Kubernetes runtime security monitoring** on Amazon EKS (Wiz Defend-equivalent); authored custom **Falco detection rules** targeting anomalous syscalls, privilege escalations (MITRE T1068), and container escapes (T1611); streamed real-time alerts to **CloudWatch Logs**; tuned false-positive rules and maintained full SOP documentation.

TECHNICAL SKILLS

Cloud & IaC: AWS (Security Hub, GuardDuty, CloudTrail, IAM, VPC, CloudWatch, EventBridge, Lambda, Step Functions, S3, DynamoDB, SNS, API Gateway, Secrets Manager, EKS, ECR) | **Terraform** | GitHub Actions | Checkov

SIEM & SOC: Splunk | IBM QRadar | Microsoft Sentinel (Learning) | KQL (Learning) | Detection Rule Development | Alert Triaging | Incident Response

Container & Runtime Security: Falco | Kubernetes (EKS) | Docker | Helm | DaemonSet | YAML manifests

Offensive Security: Burp Suite | Nmap | Wireshark | OSINT | Threat Hunting | TryHackMe (Jr. PT Path)

Scripting: Python | Bash | PowerShell | Linux (RHEL admin, Kali) | Windows | Git

Frameworks & GRC: MITRE ATT&CK | NIST CSF | ISO 27001 | SOC 2 | CIS Controls | OWASP Top 10 | GRC

EDUCATION & LEADERSHIP

B.Tech, Computer Engineering – MIT Academy of Engineering, Pune

2022–Jun 2026

CGPA: **8.53** | SGPA: **9.80 (Sem 7)** | Finalist – SIH 2024 | Finalist – Cavista 2025 | Top 10 – ScrollHacks Global Hackathon

President, ACM Student Chapter (ID: 9449572) | **IEEE Student Member** (ID: 101006948)
